Why Choosing ICT ?

- Computer technology is NOT just a specific subject. It involves practical skills can be applied in almost every industries:

Mythbuster for ICT

- Do I need to be very clever to study in ICT?

No. ICT is suitable for every students, it is not a particularly difficult subject

- Do I need to have many computer knowledge before studying ICT?

No. ICT is for beginners to learn more about Information Technology from scratch

- Do I need to be very good in Mathematics and Science for studying ICT?

Not really. ICT DOES NOT involve high level Mathematics or Science, you just need basic understanding of both subjects

Mythbuster for ICT

- If I study ICT, does that mean I will be an IT guy in the rest of my life ?

No, far from the reality. Being an IT professional needs much more time for training. NOBODY will force you to further study in IT if you don't want to choose this path in future

- What will be taught in ICT?

Basic computer theories, network knowledge, environmental and ethical issues related to IT

Multimedia Production and Web Site Development is proposed as Elective Part

Mythbuster for ICT

- OK, finally, why choose ICT?

ICT is NOT a particular difficult subject. It is a subject for students interested in IT and want to learn more. It is also a suitable subject to get good grades for entering universities

ICT for you and me

Thank you!
